## Advances in Military Technology

[www.aimt.cz](http://www.aimt.cz)

AiMT is a peer reviewed journal that provides insight into theoretical considerations and practical innovations in military and security technology. The journal covers a broad spectrum of interests including research, development, design, manufacturing, control, utilization, reliability, sustainability, and the effectiveness of new technologies for military and security requirements. AiMT builds a bridge between theoretical perspectives and practical considerations that are of active interest to the academic, scientific, business and policy communities.

The journal welcomes original contributions of theoretical and practical interest, which have not been submitted to other journals, nor previously published. All submissions are refereed in a peer review process by experts appointed by the Editorial Board. AiMT is published semi-annually in June and December. Contributions are only published in English.

The journal has been accepted for coverage and indexing with the Scopus database. Also the License Agreement with EBSCO Publishing Inc. was confirmed.
